

It would be in the best interest everyone to continue with the ARRL plan of restructuring. It has been very well thought out. It would be a value to the industry, government and public service. Emotionalizim over CW is of no value, but the future of CW is not in question and I believe will increase the use of CW. At this time in history with the threat of terrorizm it is in the national best interest to increase Amateur Radio operators in the General Class. It would also be in the best interest to all to also increase the number of MARS operators. I believe the ARRL's plan helps do those very things while meeting international obligations. 73 Thank you.
